Are you referring to the maps on the website?

The summaries are the ASPECT related reports. Sorry for the confusion.

Hi Arturo,

I'm not sure I understand. Where are the summaries?

Bakeyah,

We only have air monitoring results from TAGA and ASPECT; they are presented as summaries. Watch for updated information as more becomes available.

Arturo

Subject: air monitoring results

Hi Arturo,

Thanks for the EJ call. I have reviewed the air monitoring information on the EPA Hurricane Harvey website. It does not provide the actual values EPA obtained - only green routes indicating that the measured concentrations (for both the TAGA and the ASPECT) did not exceed TCEQ short-term AMCVs. Am I looking in the right place? Is this information on the website somewhere? If not, I would like to request the actual values EPA obtained using both the TAGA and the ASPECT. Please let me know what additional information you need from me. Thanks.

Bakeyah
